

Count on Me

Cub Scouts · Elective · Lion rank

Name

Started

Completed

Count on Me makes math into play. You'll make pictures with shapes, play number games, and sort and count things you find at home. Math is everywhere once you start looking.

Requirements

Every official requirement, in plain language. Check the official wording when you sign off (scouting.org/cub-scout-adventures/count-on-me/). Tips and examples are ideas, not extra requirements.

☐ **1** Make a lion out of nothing but squares, triangles, and circles

Tip: Cut squares, triangles, and circles out of colored paper and glue them into a lion face.

Example: A big yellow circle makes the lion's face, small orange triangles go all around for the mane, two little circles are the eyes, and a square nose sits in the middle.

☐ **2** Play a counting or number game with your adult partner or den

Tip: Play a simple game like dice, cards, or hopscotch where you count out loud.

Example: Play a dice game: roll the die, count the dots out loud, and hop that many times. Or play hopscotch and count each square as you land on it.

☐ **3** Sort a group of items by shape, then by color, then by one more category; count the different shapes in each group; then build something using just one group

Tip: Gather toys or buttons and sort by shape, then color, then size. Count the different shapes in each pile, then build something with one pile.

Example: Dump out a bin of blocks. Sort them by shape, then by color, then by size. In each pile, count how many of each shape you have and write the numbers down. Then build a tower using only the red pile.
