

Everyday Tech

Cub Scouts · Elective · Lion rank

Name

Started

Completed

Everyday Tech helps you notice the technology all around you. You'll find gadgets at home and in your neighborhood, see how they help people, and show how you use devices safely. It's a smart start to being a good tech user.

Requirements

Every official requirement, in plain language. Check the official wording when you sign off (scouting.org/cub-scout-adventures/everyday-tech/). Tips and examples are ideas, not extra requirements.

☐ 1 Look for technology in your home, meeting place, or neighborhood

Tip: Go on a tech hunt at home: microwave, lamp, doorbell, phone. Count how many you can find.

Example: On a tech hunt, find a refrigerator that keeps food cold, a traffic light that tells cars when to go, a doorbell, a washing machine, and a thermostat. Draw your three favorites.

☐ 2 Explore ways digital technology makes life easier

Tip: Talk with your adult about how a video call, map app, or timer makes life easier.

Example: A video call lets you see Grandpa even when he lives far away. A map app helps your family find a new park. A timer reminds you when cookies are done.

☐ 3 Pick a digital device you use at home and show your adult partner how to use it safely

Tip: Show your adult partner how you ask permission first, stay on approved apps, and tell a grown-up if something seems wrong.

Example: Show your adult how you ask before using a device, only open apps they said are okay, keep your name and address private, and tell a grown-up right away if something makes you feel funny.
