

Tech All Around

Cub Scouts · Elective · Tiger rank

Name

Started

Completed

Tech All Around helps you spot technology everywhere and use it safely. You'll find tech at home and in town, talk about how it helps, and set up device rules with your family. Smart tech habits start early.

Requirements

Every official requirement, in plain language. Check the official wording when you sign off (scouting.org/cub-scout-adventures/tech-all-around/). Tips and examples are ideas, not extra requirements.

☐ **1** Look for technology in your home, meeting place, or neighborhood

Tip: Go on a tech hunt and count the gadgets you find, like the fridge, a traffic light, or a phone.

Example: On a walk, spot a traffic light, a crosswalk button, a security camera, an ATM, and a streetlight. At home, find the fridge, washing machine, smoke alarm, and TV remote.

☐ **2** Explore ways digital technology makes life easier

Tip: Talk with your adult about how tech helps, like video calls with family or maps for directions.

Example: Talk about how a video call lets you read a bedtime story with a grandparent far away, a map app helps your family find a new playground, and a thermostat keeps the house warm.

☐ **3** Pick a digital device you use at home and show your adult partner how to use it safely

Tip: Show your adult how you ask before using a device, stay on approved apps, and tell them if something feels wrong.

Example: Show your adult: you ask before turning on the tablet, use only apps they've said are okay, never type your name or school into a game, and tell a grown-up if a message pops up from someone you don't know.

☐ **4** Set up rules for using digital devices with your parent or legal guardian

Tip: Sit down with your parent or guardian and agree on simple rules, like when and where you can use devices.

Example: Write a family device plan together: devices stay in the living room, no screens at dinner or after bath time, ask before downloading anything, and tell an adult if something feels wrong. Sign it and post it on the fridge.
